Picture-only walkthrough cards

Adult cover — keep this page out of the child’s view.

Use the exact spoken lines in FIRST-SESSION.md.

Show one card at a time. Cover the small adult footer.

Demo pages teach the rule; fresh tries have no answer cues.

For memory, remove the LOOK page before showing HIDDEN.

Demonstrate the speaker, basket and eye controls in context.

Use one activity family per short walkthrough; take breaks freely.

These are static planning cards, not a working app or a scored test.

Simple native-object diagrams use the cream and forest-green palette.

Final exercise selection and artwork remain for the later review.
